1 Introduction

This Getting Started Guide provides the user with the information required to install and use the MemMapGen tool.

1.1 Purpose

This document outlines the steps needed to install the MemMapGen module and also offers advice on usage.

Intended Use

All ETAS RTA-CAR users who want to generate a MemMapGen file for the AUTOSAR components they have created.

1.2 Document Conventions

`OCI_CANTxMessage msg0`	Code snippets are shown in a monospaced Inconsola typeface.
Choose **File→Open**.	Menu commands are shown in boldface.
Click **OK**.	Buttons are shown in boldface.
Press <ENTER>.	Keyboard commands are shown in angled brackets.
The 'Open File' dialog box is displayed.	Names of program windows, dialog boxes, fields, etc. are shown in quotation marks.
Select the file *setup.exe*	Text in drop-down lists on the screen, program code, as well as path- and file names are shown in italics.
A *distribution* is always a one-dimensional table of sample points.	General emphasis and new terms are set in italics.

1.3 Privacy Statement (GDPR)

Your privacy is important to ETAS so we have created the following Privacy Statement that informs you which data are processed in RTA-CAR, which data categories RTA-CAR uses, and which technical measures you have to take to ensure users' privacy.

Where relevant, we also provide additional information on where RTA-CAR stores personal or personal-related data, and how it can be deleted.

1.3.1 Data Processing

Personal or personal-related data or data categories are processed if using the ETAS License Manager (LiMa). The purchaser of this product is responsible for the legal conformity of processing the data in accordance with Article 4 No. 7 of the General Data Protection Regulation (GDPR). As the manufacturer, ETAS GmbH is not liable for any mishandling of this data.

When using the ETAS License Manager in combination with user-based licenses, the following personal or personal-related data or data categories are recorded

on the license server for the purposes of license management:

- Communication data: IP address
- User data: UserID, WindowsUserID

1.3.2 Technical and organizational measures

This product does not encrypt the personal or personal-related data or data categories that it records. Ensure that the data recorded are secured by means of suitable technical or organizational measures in your IT system. Personal or personal-related data in log files can be deleted by tools in the operating system.

1.4 Safety Notice

For any safety related development that uses the RTA-CAR tool you should apply an applicable safety standard such as ISO 26262:2018.

The ETAS_Safety_Advice.pdf provides additional safety information.

2 System Requirements

Please refer to the latest RTA-CAR Release Notes for more details.

3 Installation

Main key component of MemMapGen:

- MemMapGen Program, plugins, and documentation.

MemMapGen itself does not write to the registry and does not require local admin rights. It can be copied from one location or machine to another without problem. MemMapGen only cares about the relative locations of the files and subdirectories under the installation folder.

MemMapGen is bundled with RTA-CAR. If new MemmepGen version is required , RTA-CAR has to be upgraded.

4 Documentation

4.1 MemMapGen Documentation Includes:

- MemMapGen Getting Started Guide (This manual)
- MemMapGen Release Notes Details of changes to MemMapGen by version.
- MemMapGen Reference Manual A complete reference to the command-line options. The refer-ence manual also includes details of implementation limits and external dependencies.
- MemMapGen Error Reference A list of the messages that MemMapGen can raise and some hints on how to diagnose and fix them.

5 ETAS Contact Addresses

5.1 Technical Support

Technical support is available to all users with a valid support contract. If you do not have a valid support contract, please contact your regional sales office.

- https://www.etas.com/en/contact.php

The best way to get technical support is using the online support portal RTA Hotline:

- https://rtahotline.etas.com/

It is helpful if you can provide technical support with the following information (where relevant):

- Your support contract number
- The version of the ETAS tools you are using
- The version of the compiler tool chain you are using
- The command line (or reproduction of steps) that result in an error message
- The error messages or return codes you received (if any)
- Your RTA-CAR Project or if not possible the arxml file(s) containing the error(s).
- The *Diagnostic.dmp* if it was generated
